

Pulses.
9 October, 2025.
Lab. Charles Wu.

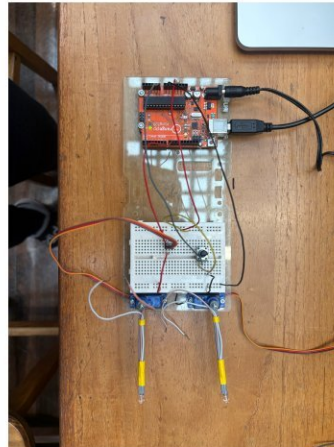

Reference: Lab skills, section 2.

Aim: Use oscilloscope to test pulses & use pulses to control servos.

Procedure:
Test the servo motors.

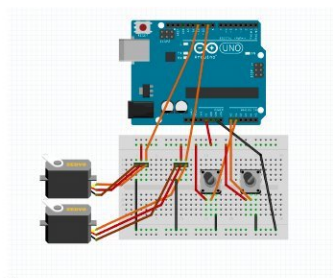

Circuit.

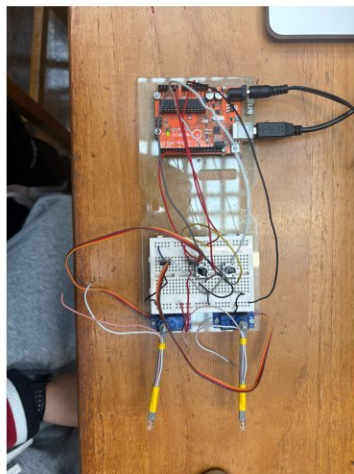

Rotating the motor using a potentiometer:

Connect 2 motors at the same time:

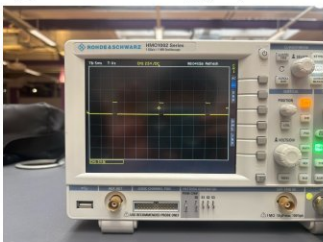

Circuit.

Rotating 2 motors using separate potentiometers:

Signals A Orangeip.

With period = 100ms

Pulse width = 10ms

Voltage = 5V.

Using cursors.

Relationship between pulse width & potentiometer & Angle of servo.

Width/ms
17.57
18.67
18.07

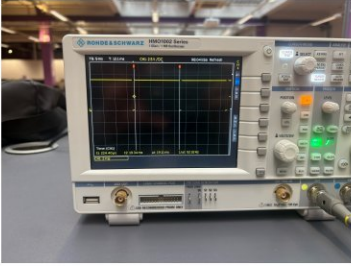

Voltage/V
0.00
3.02
1.743

Angle/°
0
90
45

19.11

4.32

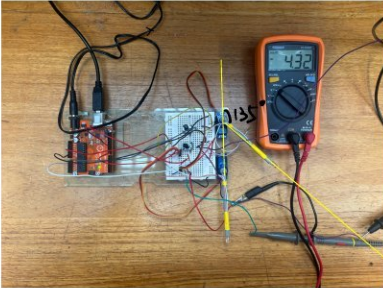

135

Experiment photo when angle = 135°

Video (showing of changing width)
